Artist Statement and Description of my Practice

Luminescence, botanical and marine organic forms inspire me to create my unique sculptural pieces of wearable art. Incorporating fused glass, pearls, clay and bone I am able to capture a moment in nature. As a metal artist, I create fluid forms that appear soft, warm and inviting in a usually cold, rigid material. Fusing the dichroic glass in each piece is reminiscent of the iridescence of butterfly wings, tropical fish, sunsets, coral reefs, and tropical Florida. Pieces are fabricated using traditional metalsmithing techniques with silver, brass, bronze, and copper. Other materials are collected from the many places I travel, African bone, Angkor Wat clay tablets, Venetian glass, Tibetan sand, and Egyptian rocks. Each piece tells a special story and shares a spiritual connection with another place and time. Each piece is a wearable work of Art. When wearing one of my pieces, others are drawn closer to examine and talk about the work, and that's where the story begins.

Experience

Jewelry Designer and Metal Smith

1978 - present

National Art Education Association

Skills

Originally educated as a painter and printmaker (etching). Discovered metal sculpture while taking a class to complete my Master's degree in 1977. I fell in love with this new form and have been creating jewelry ever since.

I taught 2D / 3D Art in a Middle and High School which includes Drawing, Painting, Stained Glass, Fiber, Sculpture, and, of course, Jewelry.

I am an avid traveler, scuba diver, nature lover, and yogi.
